The debenture is convertible into common shares of the company at a price of \$0.05 per common share, with an initial term of one year, is unsecured and bears interest at 1% per annum. In July 2017 the officer and director agreed to extend the terms of the convertible debenture for an additional year to August 2018.

The amount owing is unsecured, non-interest bearing, and due on demand. There are no fixed terms of repayment, and no guarantees were given. In August 2016, that same company lent \$3,022 to Wabi in order to pay filing fees for its annual report filings.

16. Provide details of any changes in directors, officers or committee members.
None

17. Discuss any trends which are likely to impact the Issuer including trends in the Issuer's market(s) or political/regulatory trends.

The market for exploration companies can prove challenging in terms of raising sufficient capital to fund exploration activities. There is no guarantee that fundraising efforts will be successful on a continuing basis, however, given that the company is exploring for gold, a strong market for gold itself sets an expectation that there would be a greater possibility of success in raising capital within the market in order to fund exploration work.

The company holds a small, inactive claim block, and an NSR royalty on a property which is currently in the exploration phase and is subject to environmental conditions and availability of field personnel in order to carry out its activities. Inadequate seasonal and environmental conditions from time to time

may prevent the NSR property owner from completing planned exploration procedures which can cause delays in components of its exploration program.
