AVV – CSE
News Release #16-19

July 29, 2016

Alta Vista target Aeromao Inc. releases upgrade to its line of Unmanned Aerial Vehicles.

Alta Vista Ventures (AVV-CSE) (the “Company”) announces that acquisition target Aeromao Inc. (see news releases dated July 11 and 22, 2016) has introduced a significant upgrade to the Aeromapper 300 and Aeromapper Talon fixed wing Unmanned Aerial Vehicles (UAV). This upgrade is one of the most important advances to the Aeromapper line of products since its introduction to the market in 2012.

“Once again, the Aeromapper line of UAVs increases the gap between all its competitors. There's just no match out there”, stated Mauricio Ortiz, President of Aeromao.

This upgrade allows operators of the Aeromapper UAVs to achieve an even higher level of accuracy for the aerial images captured during flight while minimizing or completely eliminating the hassle of ground control, which is typically required when using a UAV not equipped with a Global Navigation Satellite System (GNSS) with accurate kinematic geo-referencing capabilities and when high accuracy of the final data is required.

Aeromao’s GNSS Post Processing Kinematic (PPK) system provides very accurate positioning information on every camera exposure. This minimizes or even eliminates the need for Ground Control Points, which can be time consuming and is an added expense, and allows the user to easily achieve accuracies of up to 3 cm.

Using this GNSS PPK system customers will save time and money on every survey using the Aeromappers. Of the few manufacturers of UAVs around the world that offer a similar GNSS PPK system on their offerings, only Aeromao’s Aeromappers have all of these advantages as a single complete package, which places them in a very unique position on the market.

Aeromao will be exhibiting at Interdrone, Las Vegas. September 7-9 2016, where they will be displaying their line of UAVs. This is one of the most important trade shows of the industry around the globe.

About Alta Vista Ventures:

Alta Vista Ventures intends to enter the Unmanned Aerial Vehicle (UAV) industry by purchasing a varied group of established, profitable companies that will complement each other and, in turn, create a consortium of businesses that will cover all aspects of the UAV industry.

On behalf of the Board,

“Jason Springett”
Jason Springett
President
