

## **Cielo Receives Third Party Validation On Technology**

Surrey, British Columbia, Canada / November 23, 2015 / CSE:CMC: Cielo Waste Solutions Corp. ("Cielo" or the "Company") is pleased to announce that it has received an in-depth third party engineering report that has validated to show Cielo's exclusive licensed technology can convert garbage and other cellulosic feedstocks into a high quality renewable diesel distillate, which with additional refinement will meet the standard for Type B as established by CAN/CGSB-3.517 for automotive low sulfur diesel fuel oils.

Cielo has the exclusive worldwide license on a new technology and has been working with third party engineers and consulting groups to assist the technology provider in developing a unique and proprietary technology that is capable of using numerous feedstocks, such as municipal waste from landfills, paper, plastics, cardboard, sawdust, trees, tires and many other cellulosic fibers and convert them into a high grade renewable diesel distillate, capable of being refined into a diesel fuel that can be used to meet both provincial and federal mandates for blending with diesels for automotive and aircraft uses.

Don Allan, President of Cielo, states, "We have been working very hard for eleven years to get to this point. The technology has been a combination of many engineers and consultants working closely with us to create a new technology not seen before. The conversion process has now been proven to work. Garbage and/or biomass can be converted into renewable diesel. The base diesel distillate quality improved with the higher the content of the renewable feedstock. This validation allows the technology provider to move forward with international patents and then move into the final engineering design so we can continue our goal of commercialization. The validation also included the thorough review of the proformas which were very positive and encouraging".

### **About Cielo Waste Solutions Corp.:**

Cielo specializes in environmentally advanced technologies focused on materials recovery, renewable diesel and landfill reduction through responsible diversion practices. By incorporating the latest material recovery technologies, Cielo is able to achieve significant diversion from landfills while creating a feedstock specifically for renewable diesel. Cielo provides solutions for responsible waste management while also providing value added opportunities.

For more information on the Company, please contact Don Allan, President, at (403) 348-2972 ext 222, or visit the Company's website at [www.cielows.com](http://www.cielows.com) Further information regarding the Company can be found on SEDAR at [www.SEDAR.com](http://www.SEDAR.com) or by visiting our profile on [www.CNSX.ca](http://www.CNSX.ca).
