

Cielo Signs Feedstock Agreement For High River AB Waste To Renewable Diesel Refinery

Vancouver, British Columbia, Canada / July 27, 2017 / CSE:CMC: Cielo Waste Solutions Corp. ("Cielo" or the "Company") announces the signing of a multi-year feedstock agreement with Mountainview Eco Products ("Mountainview"). This agreement will provide Cielo, at a fixed cost, with an ample supply of sawdust and wood shavings to fulfill 100% of the feedstock requirements for the Company's first commercial waste to renewable diesel refinery, which is currently under construction on the Company's High River, Alberta property.

Don Allan, President and CEO of Cielo, states: "This agreement provides an excellent source of feedstock for not only our first refinery but also potentially for future planned refineries in Alberta. While Mountainview can supply 100% of our initial projected requirements, we will continue to diversify our feedstock inputs to include a wide range of garbage-derived waste streams, including municipal blue box solid waste (garbage), plastics and tires. The quality of Mountainview's sawdust and wood shavings exceeds our requirements and will allow for our feedstock costs to be significantly lower than the costs being paid by conventional biodiesel facilities for their feedstocks, which includes food-derived materials, animal tallow and or yellow/brown grease. We look forward to working with Mountainview in Alberta as we expand our refinery footprint beyond our first refinery."

Mark Haldane, President of Mountainview, commented: "We are very excited to be able to participate in such a green project with Cielo, and sell a waste product into a new industry sector. Cielo's strategy of converting waste products into high grade renewable diesel makes total sense to us from both a business and an environmental standpoint. We are extremely pleased to be a part of Cielo's strategic plan."

Cielo's technology has been proven to work in the Company's demonstration refinery ("Demo Refinery") utilizing multiple different waste feedstock streams, including garbage, tires, plastics and wood waste converting all of them, on a cost-effective basis, into high grade renewable diesel fuel, in batches of up to 50 liters an hour. Having been granted a development permit from the municipal district, which is subject to customary conditions, Cielo is now in the process of moving its Demo Refinery to High River, where it will be retrofitted into about a 356 liter per hour (2.9 million liter per year) continuous flow refinery at a projected cost of under \$2 million. Once Cielo validates that the retrofitted refinery can operate on a continuous flow basis, Cielo plans to scale up the size of its refineries to produce about 2,000 liters an hour (16 million liters a year) of high grade renewable diesel and build multiple modular refineries around the world, offsetting landfills and other feedstock supplies. Cielo intends to focus initially on building additional refineries in Alberta to fill the Canadian mandated demand for renewable diesel, almost all of which is currently having to be imported into Canada, due to the high feedstock costs and product quality issues being experienced by Canadian biodiesel producers. In the coming months and years, Cielo's goal is to replace as much as possible of the imported mandated demand, of about 650 million liters a year, with its high grade renewable fuel.

About Cielo Waste Solutions Corp.

Cielo Waste Solutions Corp. is a publicly traded company with its shares listed to trade on the Canadian Securities Exchange (“CSE”) under the symbol “CMC”. Cielo is commercializing a transformational, patent-pending, technology that can convert multiple different waste streams into renewable diesel, at a significantly lower cost than biofuel companies. Landfills are one of the world’s leading contributors to Green House Gas emissions and are projected to double in size over the next 7 years. Cielo can potentially resolve this crisis, on a cost-effective basis, by converting multiple different waste-derived feedstocks, including sorted municipal solid waste (garbage), wood and agriculture waste, tires, blue-box waste, all plastics and virtually any other cellulosic waste product into high grade renewable diesel.

Cautionary Note Regarding Forward-looking Statements

This news release contains certain forward-looking statements and forward-looking information (collectively referred to herein as "forward-looking statements") within the meaning of applicable Canadian securities laws. All statements other than statements of present or historical fact are forward-looking statements. Forward-looking statements are often, but not always, identified by the use of words such as "anticipate", "achieve", "could", "believe", "plan", "intend", "objective", "continuous", "ongoing", "estimate", "outlook", "expect", "may", "will", "project", "should" or similar words, including negatives thereof, suggesting future outcomes.

Forward looking statements are subject to both known and unknown risks, uncertainties and other factors, many of which are beyond the control of the Company, that may cause the actual results, level of activity, performance or achievements of the Company to be materially different from those expressed or implied by such forward looking statements, including but not limited to: the use of proceeds of the offering, receipt of all necessary approvals of the offering, general business, economic, competitive, political and social uncertainties; negotiation uncertainties and other risks of the grocery industry. Although the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking statements, there may be other factors that cause results not to be as anticipated, estimated or intended.

Forward-looking statements are not a guarantee of future performance and involve a number of risks and uncertainties, some of which are described herein. Such forward-looking statements necessarily involve known and unknown risks and uncertainties, which may cause the Company’s actual performance and results to differ materially from any projections of future performance or results expressed or implied by such forward-looking statements. Any forward-looking statements are made as of the date hereof and, except as required by law, neither the Company assumes no obligation to publicly update or revise such statements to reflect new information, subsequent or otherwise.
