NEWS RELEASE

Chlormet increases ownership in AAA Heidelberg after passing Health Canada MMPR Security Clearance Stage

October 22, 2015 - Vancouver, British Columbia – Chlormet Technologies Inc. (“Chlormet” or the “Company”) (CSE: PUF) (Frankfurt: HR2P) (OTCPK: CHLMF) is pleased to announce that pursuant to its share exchange agreement (see news release dated January 28, 2015) it has increased its ownership stake in the MMPR applicant entity to 45.39% by releasing 2,000,000 common shares of the Company to shareholders of AAA Heidelberg.

As per the share exchange agreement, Chlormet will issue additional shares as AAA Heidelberg continues to advance through the MMPR application process. An additional 2,000,000 common shares will be issued upon the receipt of notification from Health Canada that AAA Heidelberg has cleared the Review Stage. A further 10,000,000 common shares will be released upon the issuance of a Health Canada MMPR license. This final release would complete the ownership exchange between the two entities.

A Liberal majority government:

The Company’s management and Board of Directors would like to congratulate the Liberal party and its leader Justin Trudeau on their victory in the recent Canadian federal election as this presents a significant step forward in the potential legalization of marijuana in Canada. Prime Minister-designate Trudeau, has been open about his support for the legalization of marijuana in Canada.

Dundee Capital Markets analyst Aaron Salz estimates that if marijuana was to become legal in Canada the size of the recreational market could be potentially valued at \$2-5 billion annually.

Chlormet’s President Yari Nieken stated, “With a Liberal majority government, I believe the medical marijuana industry’s prospects are incredibly bright. This is a very exciting time for our industry and we are confident in our ability to capitalize on this opportunity in the near future.”

About AAA Heidelberg:

AAA Heidelberg owns a secure 8,800 square foot commercial building and land located in London, Ontario, that has been converted into a state of the art medical marijuana grow facility. Since December 2013 AAA Heidelberg has had

an application pending with Health Canada for a MMPR license for the production of up to 1,320 pounds of marijuana in the first year.

Since filing its initial application AAA has made significant personnel acquisitions and developed relationships to prepare for entering the medical marijuana space. AAA Heidelberg's personnel includes an experienced grow-master who is currently a 'designated grower' under current MMAR licensing. He has successfully grown multiple strains of marijuana for over 5 years.

About Chlormet Technologies

Chlormet Technologies Inc. is also moving into the Medical Marijuana sector by purchasing a 100% interest in AAA Heidelberg, a private Ontario company that is in the process of applying for a MMPR license. Although the Company cannot guarantee nor estimate the timing for the issuance of a license to AAA Heidelberg, it is Chlormet's goal to become the next publicly traded Canadian company to be granted a new medical marijuana production license.

VapeTronix, a wholly owned subsidiary of the Company is in the process of expanding its 1313 brand of electronic cigarettes and associated technologies.

With the purchase of the property in Whatcom County, WA, the company plans on generating revenues via long term leases to tenants.

ON BEHALF OF THE BOARD OF DIRECTORS

"Yari Nieken"

President and CEO
