About Global Remote Technologies

Global Remote Technologies focuses on the deployment of emerging technologies for the energy sector. Through the use of its advanced engineering and leadership experience, the Company brings cutting-edge processes and technologies to the oil patch. Its remote sensor packages transmit telemetry from drilling and production sites, in real time, to a central server where it is viewed in the cloud. The systems are designed to provide key personnel with an early warning system to avoid equipment failures or costly compliance fines. The Company collects and communicates vital information on the status of equipment, tanks, and pipelines for exploration, production, and transmission of oil, gas and water. The Company has licensed multiple patent pending tools for the oil and gas industry, set to be released in 2015. Headquartered in Vancouver, BC, Global Remote Technologies also has offices in Denver, Colorado and Houston, Texas.
