GLOBAL REMOTE TECHNOLOGIES ENTERS INTO SERVICE AGREEMENT WITH BLACK GOLD PUMP & SUPPLY INC

Vancouver, B.C. – {May 18, 2016} Global Remote Technologies Ltd. (the “**Company**”) (CSE:RGT), (Frankfurt Stock Exchange:GR9) is pleased to announce it has entered into a service agreement with Black Gold Pump & Supply, Inc (“**Black Gold**”) for the Company’s Helix downhole well simulation tool. This agreement allows Black Gold to use and distribute the Helix tools in California and grants GRT a distributorship for all of Black Gold’s products and services in the Texas and Oklahoma markets.

Chris Dorris, CEO of the Company, stated, “We’re very excited about this new relationship with Black Gold as an important step towards achieving our goal of 8 new customers by the end of this last quarter of 2016. As Black Gold is a California based company this also will provide the opportunity for Global Remote and the Helix tool to break in to markets outside of our predominant focus of Texas, Louisiana and the South East.

About the Helix Tool

The Helix tool uses a patent pending design and engineering method to achieve unique flow patterns that are more effective for wellbore cleanouts than any other design on the market. The Helix tool is a downhole cleaning and simulation technology that combines traditional oscillation and pulse jetting structures into a single pattern. For more information about the Helix tool, equipment, and technology acquired by the Company, please refer to the Company’s news release issued on October 27, 2015.

About Black Gold Pump & Supply

Black Gold is a private company with headquartered in California. Black Gold creates, manufactures, sells, and distributes a wide variety of API and non-API parts, products, and services for oil rigs and supporting equipment. Black Gold Pump & Supply is a leading expert in production well analysis. Black Gold assists with raising production to get the maximum amount of fluid and the slowest unit speed possible; ensuring greater efficiency. About Global Remote Technologies

The Company focuses on the deployment of emerging technologies for the energy sector. The Company has licensed multiple patent pending tools for the oil and gas industry. Using its advanced engineering and leadership experience, the Company brings cutting edge processes and technology to the oil patch. Its remote sensor packages transmit telemetry from drilling and production sites in real time to a central server where it is viewed in the cloud. The systems are designed to provide key personnel an early warning system to avoid equipment failures or costly compliance fines. The Company collects and communicates vital information on the status of equipment, tanks, and pipelines for exploration, production, and transmission of oil, gas and water. In addition, the Company recently acquired a Helix downhole well simulation tool and related technology. The tool uses a patent pending design and engineering method to achieve a unique flow pattern for wellbore simulation. The Company is headquartered in Vancouver, BC, with offices in Denver, Colorado and Houston, Texas.
