CRITICAL ACCOUNTING ESTIMATES

The Company’s critical accounting estimates include the useful life and amortization of property and equipment and intangible assets, measurement of share-based payments, and deferred income tax asset valuation allowances. Estimates are based on historical experience, current and future economic conditions and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

CHANGES IN ACCOUNTING POLICIES

The Company has not made any changes to its accounting policies. Management has considered that the following amendments, revisions and new IFRSs that are mandatory for annual periods beginning after January 1, 2016, or later periods might not have a material effect on our future disclosure, results and financial position:

- IFRS 9, *Financial Instruments*
- IFRS 15, *Revenue from Contracts with Customers*

Other accounting standards or amendments to existing accounting standards that have been issued but have future effective dates are either not applicable or are not expected to have a significant impact on our financial statements.

FINANCIAL AND OTHER INSTRUMENTS

The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework. The Company's risk management activities include the preservation of its capital by minimizing risk related to its cash. The Company does not trade financial instruments for speculative purposes. The Company does not have a risk management committee nor written risk management policies. The Company is exposed in varying degrees to a variety of financial instrument and related risks. Those risks and management's approach to mitigating those risks are as follows:

(a) Fair Values

The Company is exposed to various financial instrument risks and assesses the impact and likelihood of this exposure. These risks include credit risk, liquidity risk, and foreign exchange rate risk. Where material, these risks are reviewed and monitored by the Board of Directors.

	Fair Value Measurements Using			Balance, January 31, 2016 \$
	Quoted prices in active markets for identical instruments (Level 1) \$	Significant other observable inputs (Level 2) \$	Significant unobservable inputs (Level 3) \$	
Cash	53,855	—	—	53,855

The fair values of other financial instruments, which include accounts receivable, short-term investment, accounts payable and accrued liabilities, notes payable, and amounts due to related parties, approximate their carrying values due to the relatively short-term maturity of these instruments.

(b) Credit Risk

Financial instruments that potentially subject the Company to a concentration of credit risk consist primarily of cash and accounts receivable. The Company limits its exposure to credit loss by placing its cash with high credit quality financial institutions. The Company performs ongoing credit evaluations, does not require collateral and establishes an allowance for doubtful accounts based on the age of the receivable and the specific identification of receivables the Company considers at risk. The carrying amount of financial assets represents the maximum credit exposure.

(c) Foreign Exchange Rate Risk

Foreign exchange rate risk is the risk that future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Company has exposure to currency risk from revenue and purchase transactions, as well assets and liabilities, denominated in US dollars. The impact of a 10% increase in the United States foreign exchange rate on assets and liabilities denominated in US dollars would result in an increase in net loss of \$65,318. The Company does not use derivative instruments to hedge exposure to foreign exchange rate risk.

(e) Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company currently settles its financial obligations out of cash. The ability to do this relies on the Company raising debt or equity financing in a timely manner and by maintaining sufficient cash in excess of anticipated needs.

ADDITIONAL DISCLOSURE FOR VENTURE ISSUERS WITHOUT SIGNIFICANT REVENUE

The Company has generated \$693,881 of revenue from operations. During the year ended January 31, 2016, the Company incurred consulting fees of \$61,481, salaries and wages of \$436,353, amortization of intangible assets of \$322,190, amortization of property and equipment of \$179,121, professional fees of \$296,499, foreign exchange loss of \$61,481, license fees of \$45,000, and subcontract services of \$422,611. The Company also incurred contract acquisition costs of \$900,000, offset by a gain of \$302,242 on the acquisition of Global Remote Technologies, LLC.

The Venture Issuer Basic Certification does not include representations relating to the establishment and maintenance of disclosure controls and procedures and internal control over financial reporting, as defined in NI 52-109.
