### **GLOBAL REMOTE TECHNOLOGIES, LLC ANNOUNCES NEW BUSINESS OPPORTUNITY**

Vancouver, B.C. – 31 July 2017- Global Remote Technologies Ltd. (the “**Company**”) (CSE:RGT), (Frankfurt Stock Exchange:GR9) is pleased to announce it is moving forward with its Kestrel technology partnership with KeyW Corp.

GRT recently hosted a meeting at its Denver office with an executive from KeyW Corp. (NASDAQ: KEYW) and Visual Globe to finalize the path forward for jointly pursuing customers in the energy sector using sensor packs and aircraft provided by KeyW Corp to field GRT’s Kestrel data system, a concept and method first introduced to KeyW Corp in January 2016. GRT and KeyW had originally scheduled a live demonstration of the technology to a major oil company (name withheld due to non-disclosure) in June-July 2017, but the test was delayed due to scheduling conflicts with KeyW aircraft. GRT is working with KeyW management to place the system into operation in August or September. GRT is excited to again have several customers awaiting a system test of this project after more than 18 months of work and preparation. Additionally, KeyW has stated that they have been marketing the Kestrel data system to several Super-majors in the preceding 12 months with excellent feedback. GRT hopes to continue to grow its great relationship with KeyW and continue to pursue clients together.

Once scheduling has been finalized for the West Texas fielding operation, GRT intends to publish ongoing results in order to keep shareholders abreast of developments with the company.

#### **About Global Remote Technologies**

The objective at Global Remote Technologies is to reduce operational costs in the energy domain, specifically the oil sector, with unique, proprietary techniques and technologies that support upstream, midstream and downstream processes. Services are developed to create custom solutions that improve performance, improve health and safety standards, and bring significant savings to clients. GRT operates in rugged locations around the globe, with offices in Canada, Mexico, Oman, and the United States. Global Remote Technologies is a public company, traded in Canada and Germany under the symbols CSE: RGT and FRA: GR9.
